Education

Southern Philippines Institute of Science & Technology   Anabu II Cavite, Philippines
Bacheclor of Science in Information Technology   2022 – Present

Experience

Freelance   Remote

Web Developer (Front-end Focused)   February – May 2025

- Designed and developed a full-featured apartment rental platform using React, Vite, and Firebase.
- Built secure authentication, real-time Firestore data integration, and RESTful API endpoints for property and inquiry management.
- Implemented responsive UI/UX and dynamic features for both tenants and landlords.

Work Immersion (Data Encoder)   March - April 2020

- Prepared source data for computer entry by compiling and sorting information.
- Added documents to file records and created new records to support filing needs.
- Managed documents by organizing forms, making photocopies, filing records.

Projects

PlaceHub (https://placehub.bsit3a2025.com/)

- Developed a comprehensive apartment rental web application using PHP, MySQL, with bootstrap framework, and JavaScript, enabling users to list, search, and book rental properties.
- Implemented secure authentication and role-based access for tenants, landlords, and admins.
- Built an intuitive admin dashboard for managing users, property listings, and rental transactions, streamlining the rental process for all stakeholders.

LeafWise Web App

- Developed LeafWise, an AI-powered web app for plant identification and using Next.js, React, and Genkit (Google Gemini).
- AI-driven image analysis, dynamic UI & TailwindCSS, multi-language support (English/Tagalog), and a local storage-based "My Collection" feature.
- Led all development phases, from AI prompt engineering and UI/UX design to feature implementation and code maintenance.

HomeHeaven Web App

- Developed 'HomeHeaven,' an apartment rental platform (React, Vite, Firebase), secure authentication, real-time Firestore data integration, and RESTful APIs for property/inquiry management.
- Delivered a responsive UI/UX for tenants and landlords, managing the complete project lifecycle from design through deployment, debugging, and client collaboration.

Skills

Languages: Javascript, HTML/CSS, PHP, C++, C, SQL (MySQL)
Frameworks: Bootstrap, Vite, Next.js, Node.js, FontAwesome, Radix UI Components, Framer Motion, lore, Lorem Picsum, TailwindCSS
Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio, Copilot, Github, MySQL Workbench, Figma, Canva, Taiga.io, Gemini, npm, cPanel, OpenAI,
Libraries: React, jQuery
